Update Event Data from LDAP   Event Data Update Status

Update Event Data from LDAP

You have requested to update DLP Events with user data from configured LDAP servers NOW. Processing can take several minutes and generating reports in the meantime may result in inaccurate reports.

Also, please note that a background process that automatically updates user data in DLP events from LDAP at scheduled intervals is built-in and may be running.

Proceed   Cancel

Policy Template Library

Show: ● General ○ by Industry ○ by Region ○ Alpha by Content Blade ○ Alpha by Policy

- ▸ Regulatory Compliance
- ▸ Acceptable Use
- ▸ Privacy Protection
- ▸ Intellectual Property Protection
- ▾ Company Confidential

401k and 403b

Identifies documents and transmissions that contain financial information related to employee retirement plans, and specifically to 401k and 403b documents used in the United States.

Confidential Documents

Identifies documents and transmissions that contain language in the header, footer or metadata indicating the content is intended only for internal or confidential company use. This policy can be customized to also look in the body of documents for the confidential terms and to modify the confidentiality terms being searched.

Contracts

Identifies documents and transmissions that contain legal information such as employment agreements, separation agreements, and non-disclosure agreements (NDAs).

Corporate Financials

Identifies documents and transmissions that contain financial information related to organizational accounting such as balance sheets, cash flow, income statements, key ratios, SEC information, and annual, quarterly, and transition reports.

Critical Infrastructure Protection

Identifies documents and transmissions related to the preparedness and response to serious incidents that involve the critical infrastructure of a region or nation. Industries that generally fall under the category of critical infrastructure are financial services, transportation, energy, communications, governmental services, public works and agriculture. Specifically, this policy looks for sensitive information in the form of disaster recovery and incident response plans as well as confident......

Employee Compensation

Captures sensitive employee financial compensation information including salaries, commissions, and bonuses.

Employee Financials

Identifies documents and transmissions that contain financial information related to employee compensation, such as offer letters, salaries, compensation, benefits, and stock options.

Internal Project Codenames

Identifies documents and transmissions that contain codenames of an organization's internal projects. This policy requires customization of the Internal Project Codenames content blade.

Invoices and Purchase Orders

Identifies documents and transmissions that contain language indicative of invoices and purchase orders (POs).

Merger and Acquisition Agreements

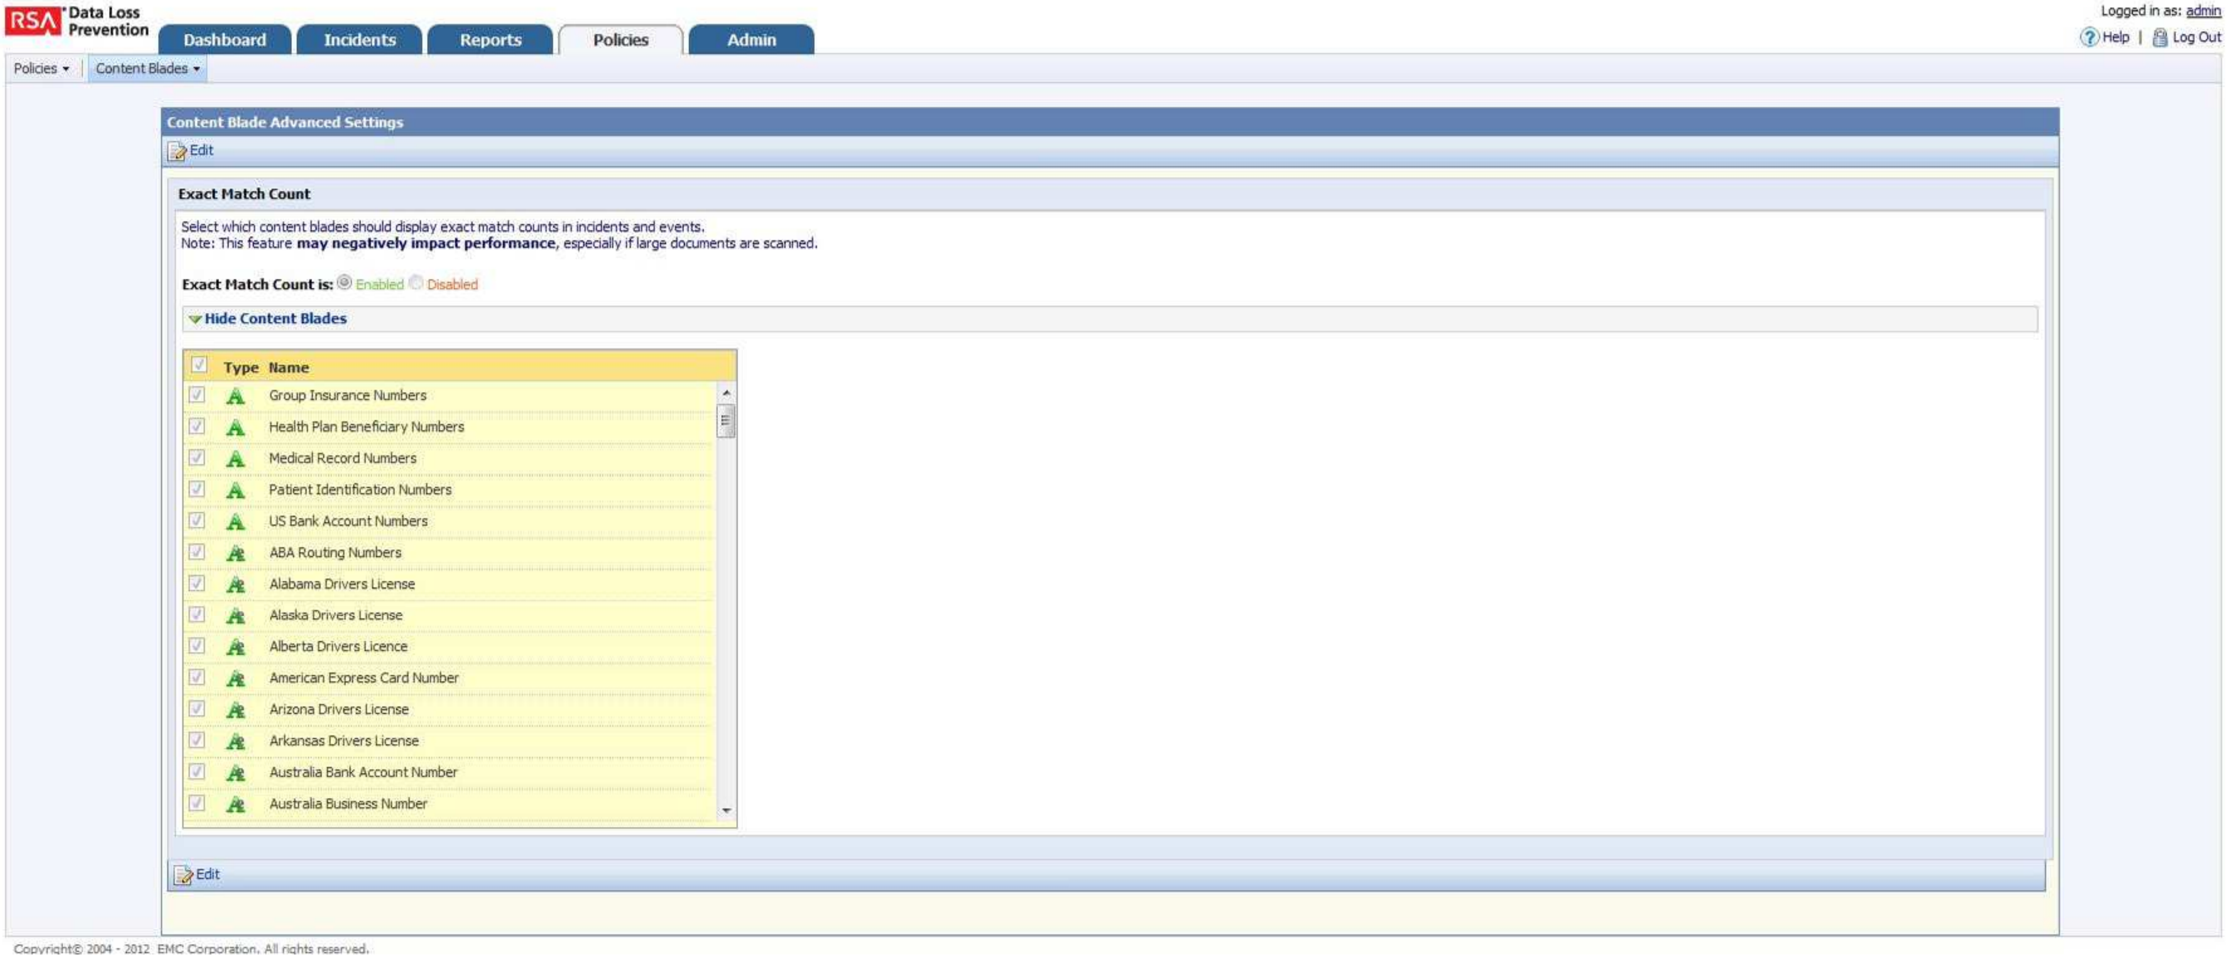
Identifies documents and transmissions that contain merger and acquisition documentation such as the stock purchase or asset purchase agreements. To monitor for incidents based-on specific organization mergers or acquisitions, create a custom content blade that requires a match to the organization names. Then, combine the new custom blade with the Merger and Acquisition Agreement expert content blade within this policy. Be sure to use the operator of AND before the custom blade.

Mergers and Acquisitions

Identifies documents and transmissions that contain information about upcoming mergers and acquisitions specific to the organization. This policy requires customization of the Mergers and Acquisitions Codenames content blade.

Network Diagrams

Identifies documents and transmissions that contain IP addresses and Visio diagrams showing an organization's network layout.



Content Blade Advanced Settings

Exact Match Count

Select which content blades should display exact match counts in incidents and events.
Note: This feature **may negatively impact performance**, especially if large documents are scanned.

Exact Match Count is: ● Enabled ○ Disabled

☑	Type	Name
☑	A	Group Insurance Numbers

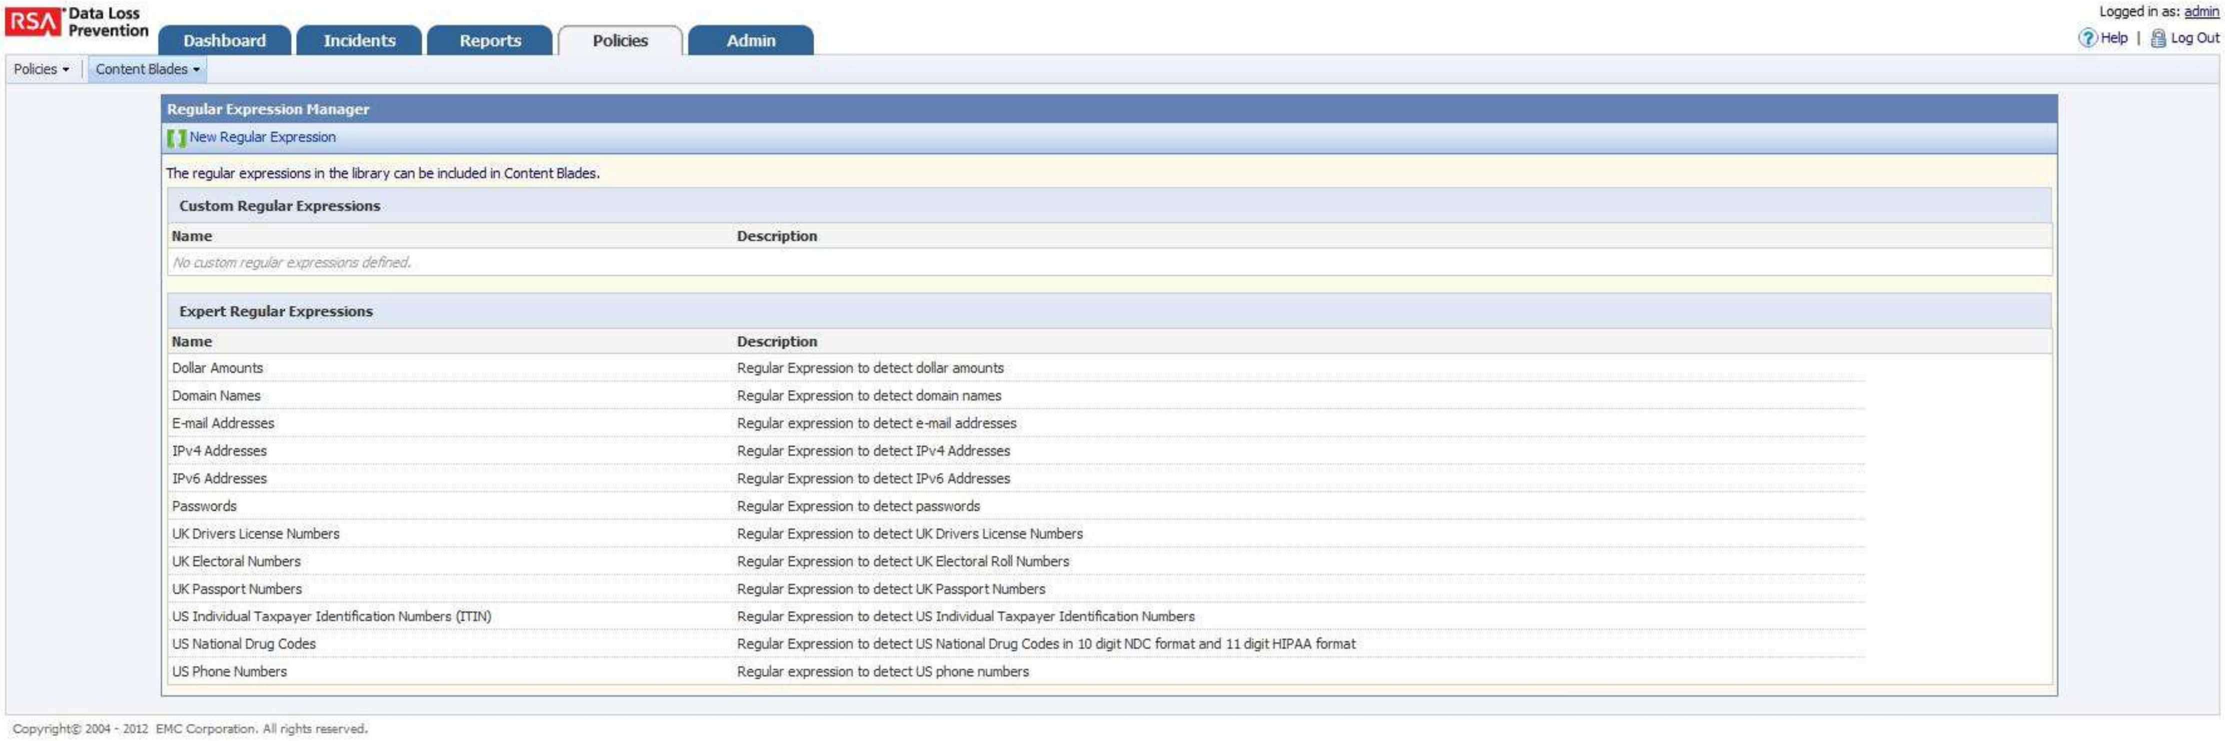
☑	A	Australia Business Number



Regular Expression Manager

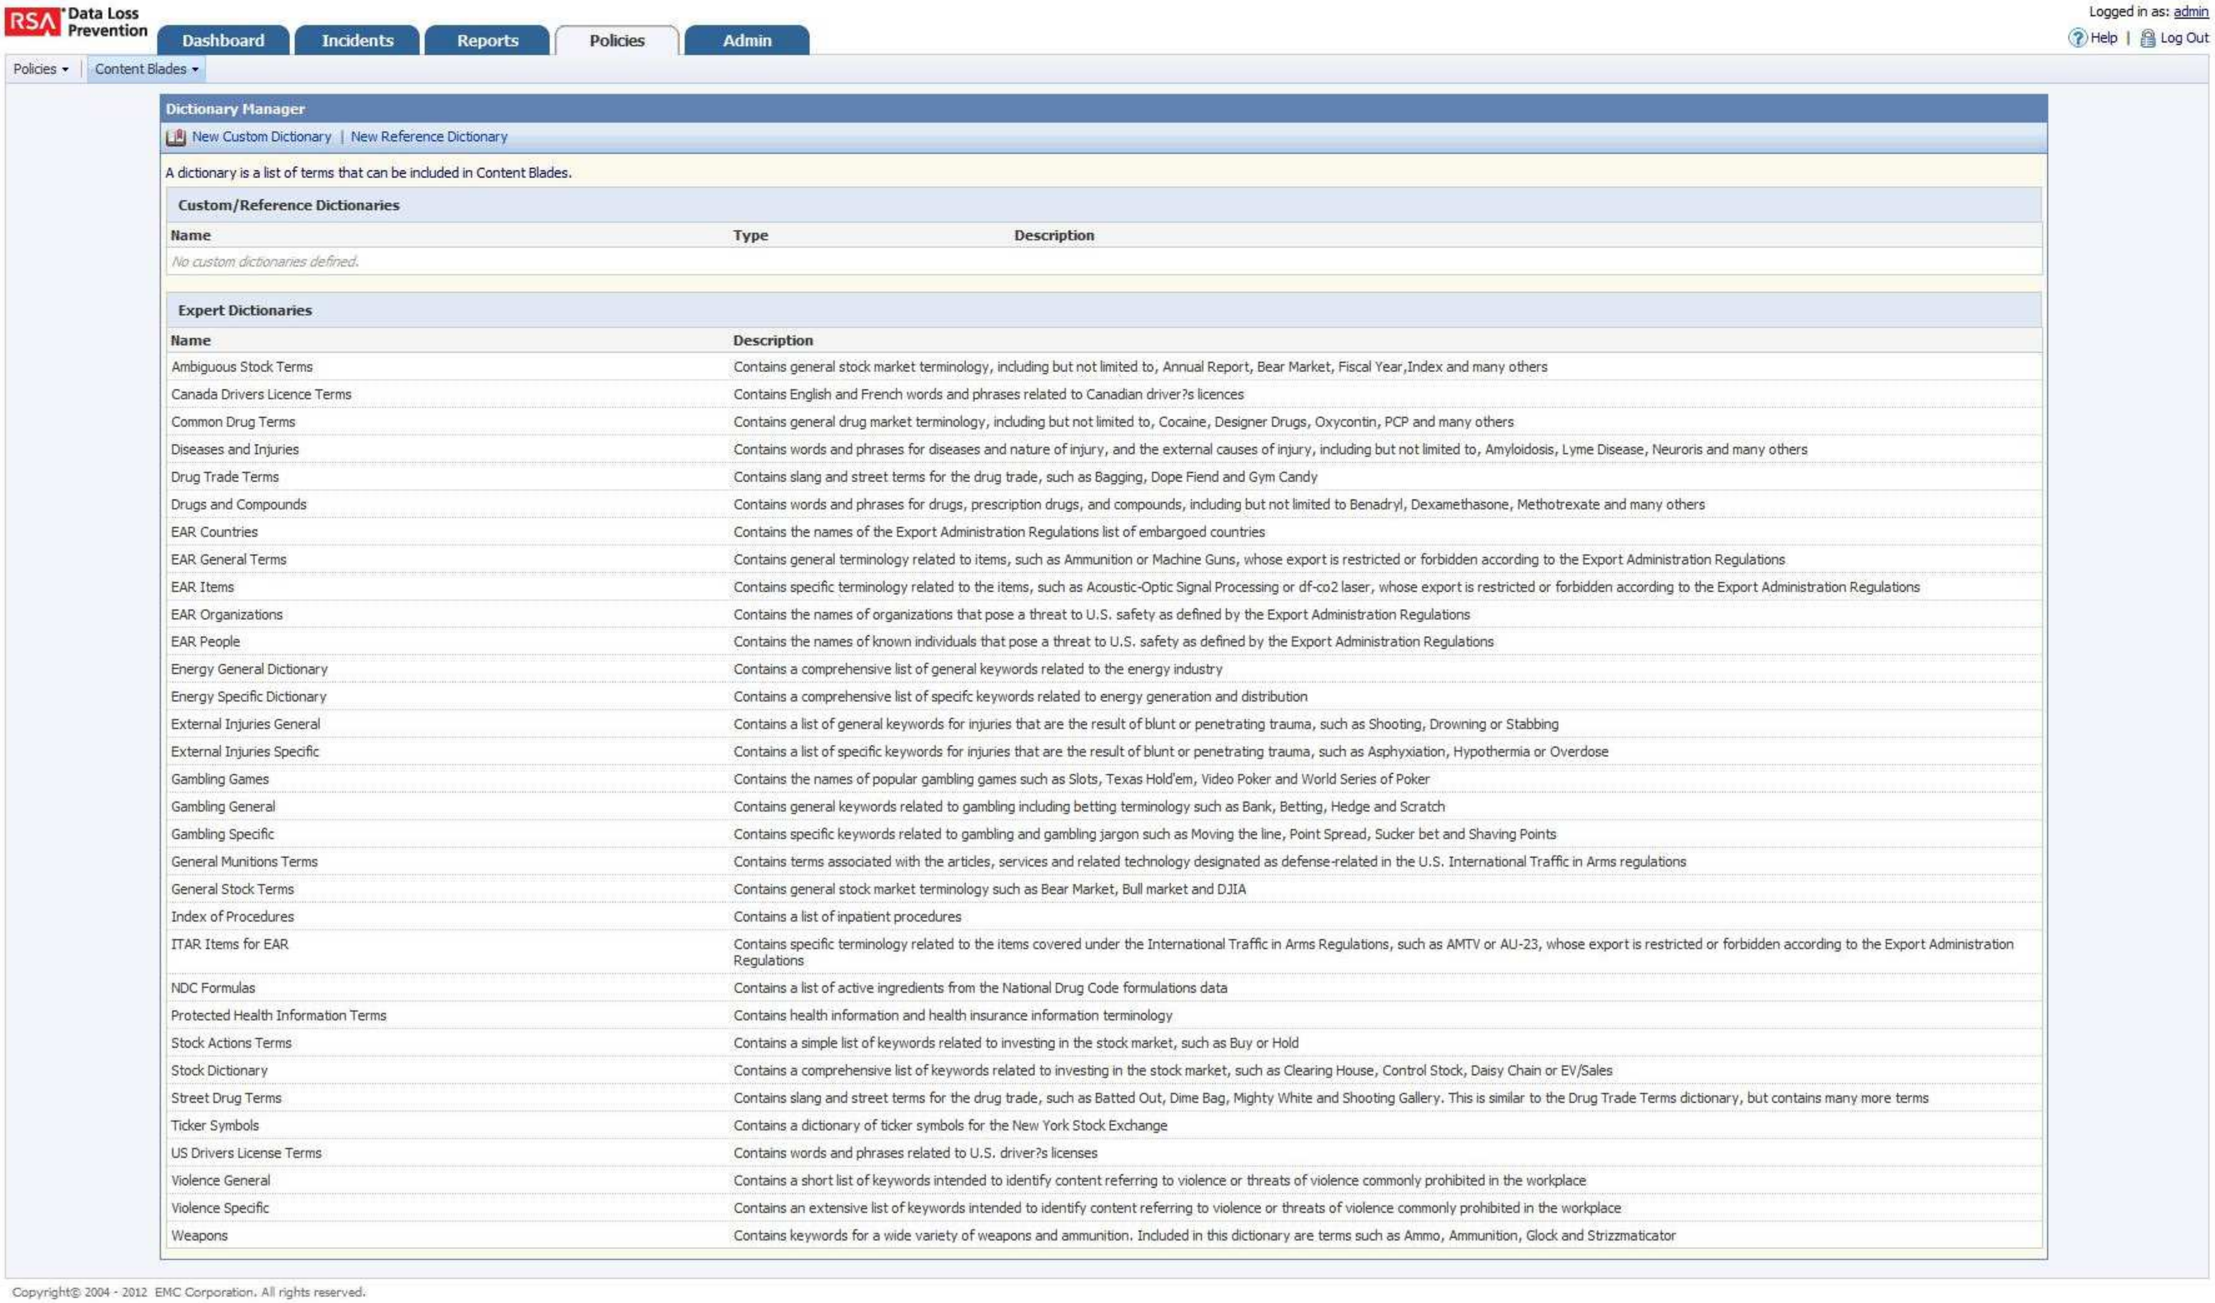
The regular expressions in the library can be included in Content Blades.

Custom Regular Expressions

Name	Description
No custom regular expressions defined.	

Expert Regular Expressions

Name	Description
Dollar Amounts	Regular Expression to detect dollar amounts
Domain Names	Regular Expression to detect domain names
E-mail Addresses	Regular expression to detect e-mail addresses
IPv4 Addresses	Regular Expression to detect IPv4 Addresses
IPv6 Addresses	Regular Expression to detect IPv6 Addresses
Passwords	Regular Expression to detect passwords
UK Drivers License Numbers	Regular Expression to detect UK Drivers License Numbers
UK Electoral Numbers	Regular Expression to detect UK Electoral Roll Numbers
UK Passport Numbers	Regular Expression to detect UK Passport Numbers
US Individual Taxpayer Identification Numbers (ITIN)	Regular Expression to detect US Individual Taxpayer Identification Numbers
US National Drug Codes	Regular Expression to detect US National Drug Codes in 10 digit NDC format and 11 digit HIPAA format
US Phone Numbers	Regular expression to detect US phone numbers



Dictionary Manager

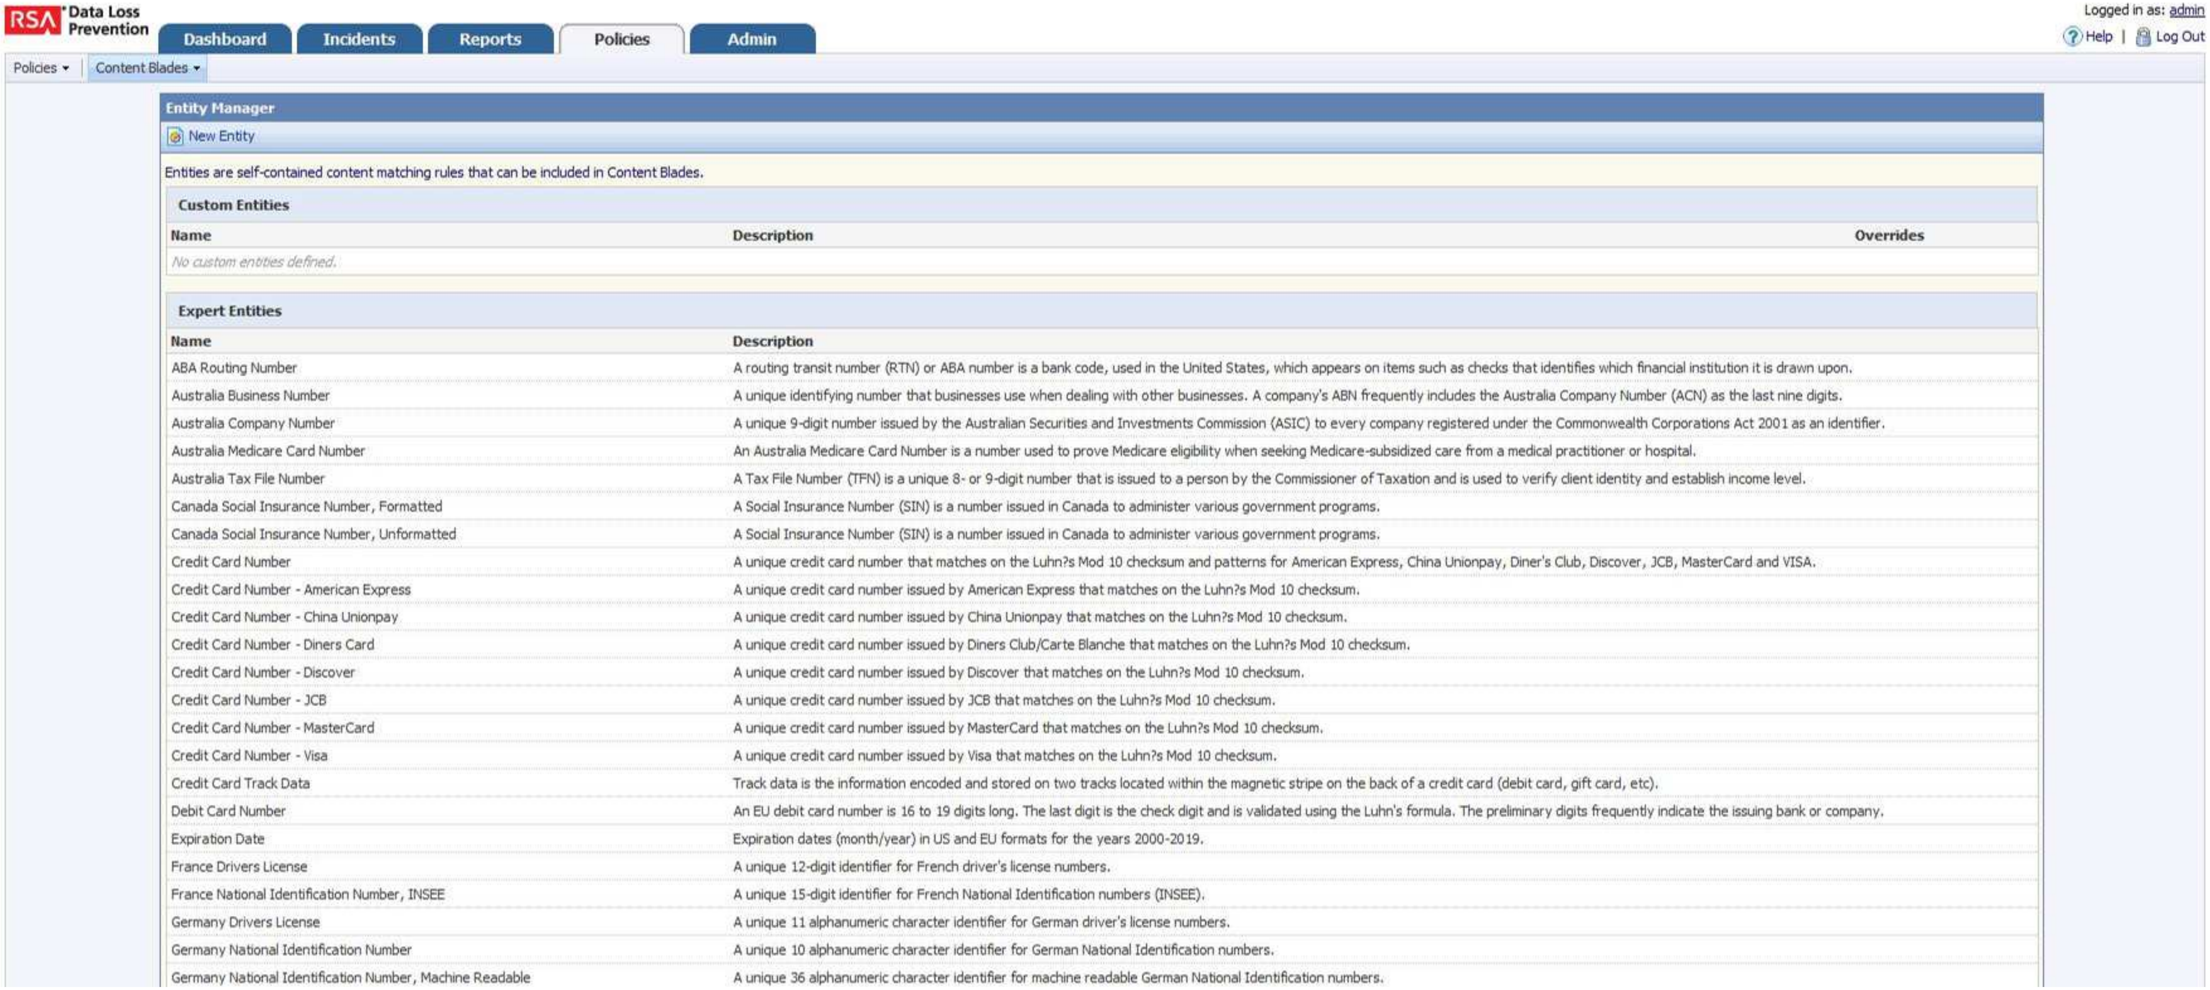
A dictionary is a list of terms that can be included in Content Blades.

Custom/Reference Dictionaries

Name	Type	Description
No custom dictionaries defined.		

Expert Dictionaries

Name	Description
Ambiguous Stock Terms	Contains general stock market terminology, including but not limited to, Annual Report, Bear Market, Fiscal Year,Index and many others
Canada Drivers Licence Terms	Contains English and French words and phrases related to Canadian driver?s licences
Common Drug Terms	Contains general drug market terminology, including but not limited to, Cocaine, Designer Drugs, Oxycontin, PCP and many others
Diseases and Injuries	Contains words and phrases for diseases and nature of injury, and the external causes of injury, including but not limited to, Amyloidosis, Lyme Disease, Neuroris and many others
Drug Trade Terms	Contains slang and street terms for the drug trade, such as Bagging, Dope Fiend and Gym Candy
Drugs and Compounds	Contains words and phrases for drugs, prescription drugs, and compounds, including but not limited to Benadryl, Dexamethasone, Methotrexate and many others
EAR Countries	Contains the names of the Export Administration Regulations list of embargoed countries
EAR General Terms	Contains general terminology related to items, such as Ammunition or Machine Guns, whose export is restricted or forbidden according to the Export Administration Regulations
EAR Items	Contains specific terminology related to the items, such as Acoustic-Optic Signal Processing or df-co2 laser, whose export is restricted or forbidden according to the Export Administration Regulations
EAR Organizations	Contains the names of organizations that pose a threat to U.S. safety as defined by the Export Administration Regulations
EAR People	Contains the names of known individuals that pose a threat to U.S. safety as defined by the Export Administration Regulations
Energy General Dictionary	Contains a comprehensive list of general keywords related to the energy industry
Energy Specific Dictionary	Contains a comprehensive list of specifc keywords related to energy generation and distribution
External Injuries General	Contains a list of general keywords for injuries that are the result of blunt or penetrating trauma, such as Shooting, Drowning or Stabbing
External Injuries Specific	Contains a list of specific keywords for injuries that are the result of blunt or penetrating trauma, such as Asphyxiation, Hypothermia or Overdose
Gambling Games	Contains the names of popular gambling games such as Slots, Texas Hold'em, Video Poker and World Series of Poker
Gambling General	Contains general keywords related to gambling including betting terminology such as Bank, Betting, Hedge and Scratch
Gambling Specific	Contains specific keywords related to gambling and gambling jargon such as Moving the line, Point Spread, Sucker bet and Shaving Points
General Munitions Terms	Contains terms associated with the articles, services and related technology designated as defense-related in the U.S. International Traffic in Arms regulations
General Stock Terms	Contains general stock market terminology such as Bear Market, Bull market and DJIA
Index of Procedures	Contains a list of inpatient procedures
ITAR Items for EAR	Contains specific terminology related to the items covered under the International Traffic in Arms Regulations, such as AMTV or AU-23, whose export is restricted or forbidden according to the Export Administration Regulations
NDC Formulas	Contains a list of active ingredients from the National Drug Code formulations data
Protected Health Information Terms	Contains health information and health insurance information terminology
Stock Actions Terms	Contains a simple list of keywords related to investing in the stock market, such as Buy or Hold
Stock Dictionary	Contains a comprehensive list of keywords related to investing in the stock market, such as Clearing House, Control Stock, Daisy Chain or EV/Sales
Street Drug Terms	Contains slang and street terms for the drug trade, such as Batted Out, Dime Bag, Mighty White and Shooting Gallery. This is similar to the Drug Trade Terms dictionary, but contains many more terms
Ticker Symbols	Contains a dictionary of ticker symbols for the New York Stock Exchange
US Drivers License Terms	Contains words and phrases related to U.S. driver?s licenses
Violence General	Contains a short list of keywords intended to identify content referring to violence or threats of violence commonly prohibited in the workplace
Violence Specific	Contains an extensive list of keywords intended to identify content referring to violence or threats of violence commonly prohibited in the workplace
Weapons	Contains keywords for a wide variety of weapons and ammunition. Included in this dictionary are terms such as Ammo, Ammunition, Glock and Strizzmaticator



Entity Manager

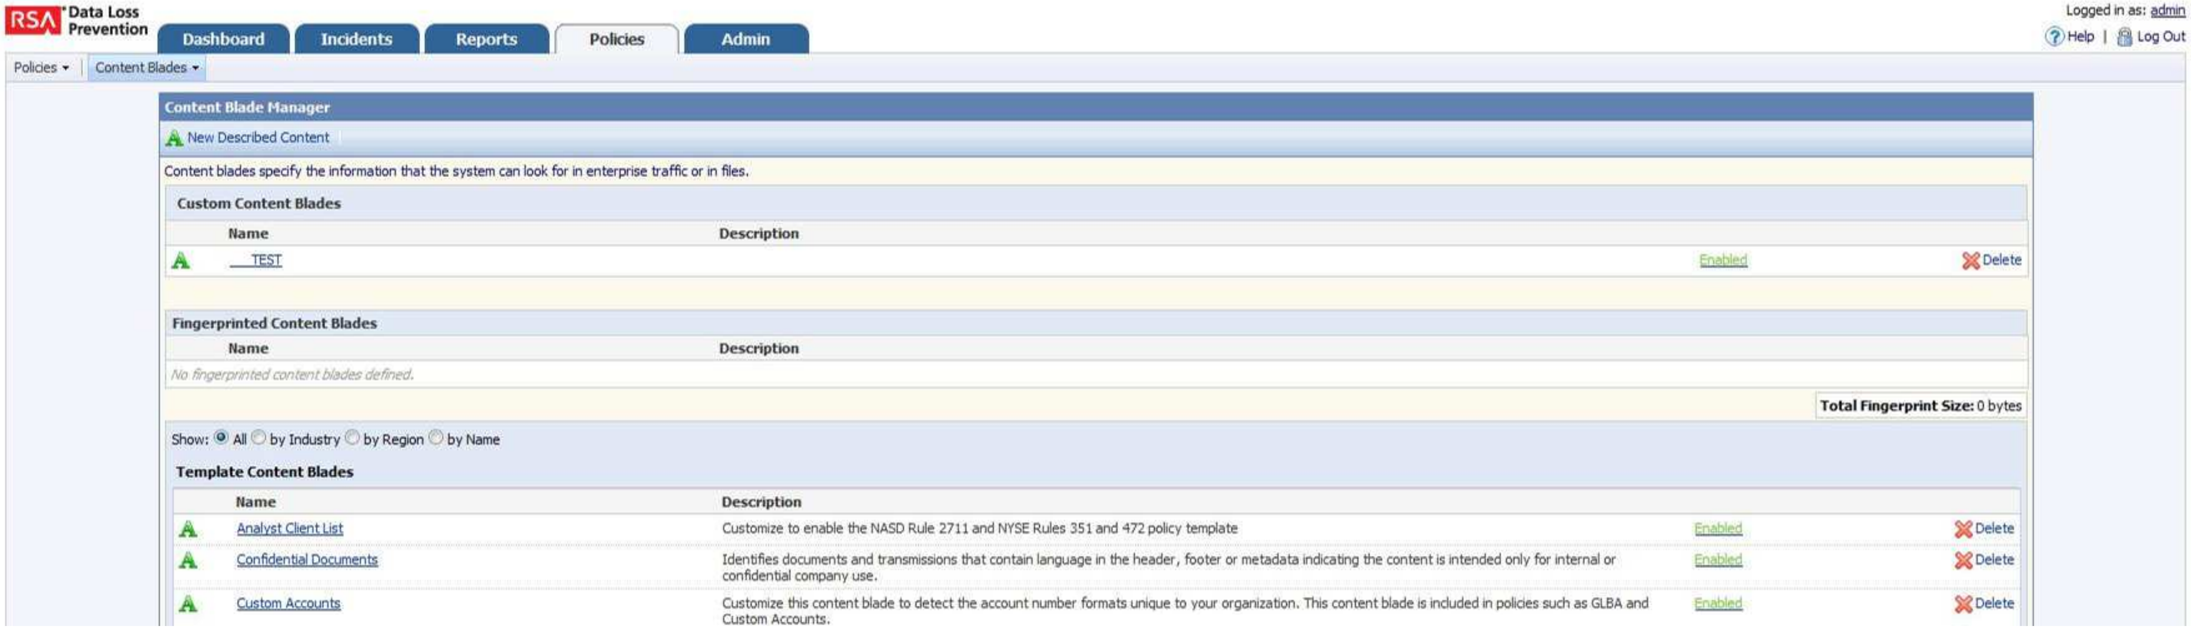
Entities are self-contained content matching rules that can be included in Content Blades.

Custom Entities

Name	Description	Overrides
No custom entities defined.		

Expert Entities

Name	Description
ABA Routing Number	A routing transit number (RTN) or ABA number is a bank code, used in the United States, which appears on items such as checks that identifies which financial institution it is drawn upon.
Australia Business Number	A unique identifying number that businesses use when dealing with other businesses. A company's ABN frequently includes the Australia Company Number (ACN) as the last nine digits.
Australia Company Number	A unique 9-digit number issued by the Australian Securities and Investments Commission (ASIC) to every company registered under the Commonwealth Corporations Act 2001 as an identifier.
Australia Medicare Card Number	An Australia Medicare Card Number is a number used to prove Medicare eligibility when seeking Medicare-subsidized care from a medical practitioner or hospital.
Australia Tax File Number	A Tax File Number (TFN) is a unique 8- or 9-digit number that is issued to a person by the Commissioner of Taxation and is used to verify client identity and establish income level.
Canada Social Insurance Number, Formatted	A Social Insurance Number (SIN) is a number issued in Canada to administer various government programs.
Canada Social Insurance Number, Unformatted	A Social Insurance Number (SIN) is a number issued in Canada to administer various government programs.
Credit Card Number	A unique credit card number that matches on the Luhn?s Mod 10 checksum and patterns for American Express, China Unionpay, Diner's Club, Discover, JCB, MasterCard and VISA.
Credit Card Number - American Express	A unique credit card number issued by American Express that matches on the Luhn?s Mod 10 checksum.
Credit Card Number - China Unionpay	A unique credit card number issued by China Unionpay that matches on the Luhn?s Mod 10 checksum.
Credit Card Number - Diners Card	A unique credit card number issued by Diners Club/Carte Blanche that matches on the Luhn?s Mod 10 checksum.
Credit Card Number - Discover	A unique credit card number issued by Discover that matches on the Luhn?s Mod 10 checksum.
Credit Card Number - JCB	A unique credit card number issued by JCB that matches on the Luhn?s Mod 10 checksum.
Credit Card Number - MasterCard	A unique credit card number issued by MasterCard that matches on the Luhn?s Mod 10 checksum.
Credit Card Number - Visa	A unique credit card number issued by Visa that matches on the Luhn?s Mod 10 checksum.
Credit Card Track Data	Track data is the information encoded and stored on two tracks located within the magnetic stripe on the back of a credit card (debit card, gift card, etc).
Debit Card Number	An EU debit card number is 16 to 19 digits long. The last digit is the check digit and is validated using the Luhn's formula. The preliminary digits frequently indicate the issuing bank or company.
Expiration Date	Expiration dates (month/year) in US and EU formats for the years 2000-2019.
France Drivers License	A unique 12-digit identifier for French driver's license numbers.
France National Identification Number, INSEE	A unique 15-digit identifier for French National Identification numbers (INSEE).
Germany Drivers License	A unique 11 alphanumeric character identifier for German driver's license numbers.
Germany National Identification Number	A unique 10 alphanumeric character identifier for German National Identification numbers.
Germany National Identification Number, Machine Readable	A unique 36 alphanumeric character identifier for machine readable German National Identification numbers.



Content Blade Manager

Content blades specify the information that the system can look for in enterprise traffic or in files.

Custom Content Blades

	Name	Description		
A	__TEST		Enabled	Delete

Fingerprinted Content Blades

Name	Description
No fingerprinted content blades defined.	

Total Fingerprint Size: 0 bytes

Show: ● All ○ by Industry ○ by Region ○ by Name

Template Content Blades

	Name	Description		
A	Analyst Client List	Customize to enable the NASD Rule 2711 and NYSE Rules 351 and 472 policy template	Enabled	Delete
A	Confidential Documents	Identifies documents and transmissions that contain language in the header, footer or metadata indicating the content is intended only for internal or confidential company use.	Enabled	Delete
A	Custom Accounts	Customize this content blade to detect the account number formats unique to your organization. This content blade is included in policies such as GLBA and Custom Accounts.	Enabled	Delete

Endpoint Coordinators

Route status messages and other agent information up to Enterprise Manager.

Initialize Root Endpoint Coordinator

Before you can see the status of your Endpoint Coordinators (EPC), you must first initialize the Root Endpoint Coordinator in Enterprise Manager. If you have not done so already, please install the Root Endpoint Coordinator software on your designated server. Installation help is available.

Once the Root Endpoint Coordinator is installed, you will need the following information before proceeding with initialization:

- Hostname of the Root Endpoint Coordinator
- Thumbprint generated on installation of the Root Endpoint Coordinator
- Passcode defined during installation of the Root Endpoint Coordinator

Updated at 12/7/2012 7:12:52 PM GMT
